

# **The 5-Point Digital Safety Shield**

A professional prescription to protect Indian seniors from 90% of common digital scams.

## **1. The 3-Second Rule**

Never click links in SMS regarding 'Electricity Bills' or 'KYC Expired'. Stop. Take 3 seconds to look at the sender's mobile number. If it's a personal 10-digit number, it is 100% a scam.

## **2. Biometric Lockdown**

Switch your phone from PIN/Pattern to Fingerprint or FaceID. Scammers can see you type a PIN in public, but they cannot steal your thumbprint.

## **3. WhatsApp Filter**

Go to Settings > Privacy > Groups. Change to 'My Contacts'. This prevents random scammers from adding you to 'Stock Market' or 'Lottery' groups.

## **4. Weekly Router Refresh**

Switch your Wi-Fi router off and on once every Sunday. This clears hidden malware residing in the device's temporary memory.

## **5. The Call-the-Doctor Protocol**

If someone claiming to be a 'Police Officer' or 'Bank Manager' asks for money via UPI, hang up immediately. Call your Everwatch Cyber Doctor for verification.
